

Aruba, June 11, 2021

Dear Timeshare Member,

We are very excited to share the details of our upcoming room renovation scheduled for the following year 2022! With an elevated design and more optimal hotel suite layout, this renovation was built upon our commitment to provide our timeshare members and guests with the best possible experience from the hotel suites and common spaces to the services we continue to elevate at Renaissance Ocean Suites. We are confident that through the extensive evaluation of our Members' needs and evolving travel requirements, the new design and hotel suite layout will surpass expectations!

We will start the room renovation of the 259 rooms at the Renaissance Ocean Suites in April 2022 and the project is scheduled to be completed by the end of the same calendar year. In advance of revealing the finalized model room, which will be ready and available for everyone to view late August 2021, we wanted to provide more details on the design and what you can expect when you return to Renaissance Ocean Suites:

MODERN HOTEL SUITE LAYOUT

The new hotel suite layout features a design more common and more favorable among today's travelers. As our world and expectations evolve, so do our member and guests' travel needs. The new room layout adds significant natural light throughout the hotel suite and the natural flow adds more usable spaces for guests to maximize throughout their stay.

Rendering Renaissance Ocean Suites

ELEVATED DESIGN

In accordance with the Renaissance design guidelines, members and guests will be welcomed back to Renaissance Ocean Suites with public spaces featuring a soothing yet playful pallet of color. The elevator lobby will feature a vibrant wall mural by Area Environments while the guest corridors act as their own oasis to transport guests from room to room.

An extension of the colorful and inclusive lands of Aruba, the design, by internationally acclaimed [tvdesign](#), was inspired by the island's natural elements and inclusive culture, conceptualized to transport travelers to a personal oasis within the walls of their upscale accommodations. An exciting palette of tone-on-tone hues coupled with bright accents will welcome guests in combination with raw textures blending the transition between the indoors and the outdoors. Mango wood furniture with rose gold hardware compliment the multiuse soft seating in bold hues while sculptured overhead lighting and accent painted walls add height to the reimaged layout. Redefined style meets undisputed relaxation with new Marriott Bedding. A collection of blankets, pillows, mattress toppers and linens all designed with our members' and guests' comfort in mind.

ONGOING COMMITMENT TO EXCELLENCE

Throughout the years Renaissance Aruba has renovated Renaissance Ocean Suites to provide timeshare members and resort guests with a best-in-class experience that captures the destination, current travel trends and a hotel suite product that travelers have come to expect. With this renovation and future enhancements, the resort team will continue to strive for excellence that satisfies the needs of everyone who stays at Renaissance Ocean Suites.

Again, the model hotel suite will be completed late August 2021 and we are happy to schedule in-person and virtual tours upon request. We will take recommendations under advisement at that point.

We thank you for your cooperation and support during these improvements in year 2022 as some members may not be able to occupy their contractual unit as it might be going through renovation during the duration of your stay at the Renaissance Ocean Suites.

Sincerely,
Renaissance Aruba Resort & Casino

Paul Gielen
General Manager
